There are no PolReps for the site. I'm not sure what you would track on this.

Okay...How is this one going to be tracked if not on the website? I do not know anything (you know that). I just know that Susan wants me to get everything into the website, track it and print the final pollreps, and put them into a book. Is there a way we can get the pollreps without doing it on a website?

There is a site named that but no website. Its such a weird situation that a website is not a good idea.

Hi Greg,

Do you have a site or potential site that has the name Bayou Corne by any chance? Susan gave me a list of sites to check out on the EPA/ OSC website and this name was on her list with you as the OSC.

If this name is not correct or possibly only partially correct would you give me the details? I would greatly appreciate your help.
